## Recommendations for Patient Testing Positive for SARS-COVID-2 Virus

- Self-isolation at home for 14 days following the onset of symptoms or, if no symptoms, 14 days after testing
- Self-isolation means a separate room and bathroom if feasible and possibly a separate location. Others may get food and necessities for you
- You may treat any specific symptoms with over-the-counter medications, hydrate well and call your primary care provider or go to the emergency department if symptoms worsen.
- Notify your health care provider of your condition and ask what follow-up will be necessary

*Southwest Clinic*  
5429 Robinson Rd. Ext.
